Atos

01

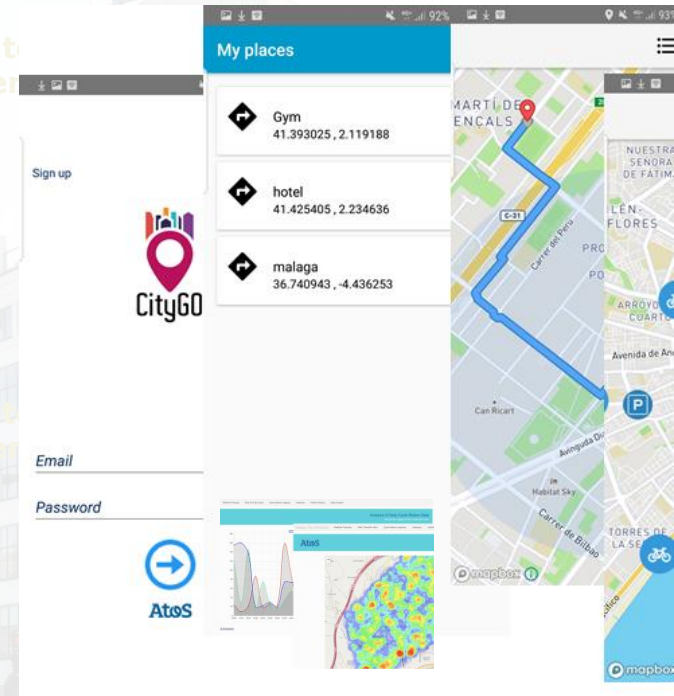

Goals

- ▶ Foster use of public transport
- ▶ Better traffic and parking management
- ▶ Plan and enjoy better transit routes in a city
- ▶ Gives information on users' regular itineraries & enables better planning on traffic resources for city

02

Solution

- ▶ The **CityGO Android mobile APP** provides recommendation to the user on what's the best itinerary to take and what's the best means of transport he can take based on the real time information
- ▶ A **web dashboard (CityDash)** allows the municipality to visualize the status of transportation means and usage by the citizens

Based on FIWARE and open industry standards
